

Peter Dean, MD, FACC, has expertise in pediatric and congenital cardiology, sports cardiology, and echocardiography. His professional interests are primarily devoted to caring for patients with pediatric and congenital heart disease and young athletes with known or suspected heart disease. He is also the medical director of the pediatric exercise stress laboratory, interprets echocardiography for children and adults with congenital heart disease, performs fetal echocardiograms, and cares for patients with connective tissue disorders. He serves as the team cardiologist for University of Virginia student-athletes along with other local universities.

Dr. Dean earned his BA in chemistry at Washington and Lee University in Lexington, VA and he earned his MD at the University of Virginia in Charlottesville, VA. He completed his pediatrics residency at the University of Virginia and his fellowship in pediatric cardiology at Children's National Medical Center in Washington, DC. He is board certified in general pediatrics and pediatric cardiology. He is an associate professor at the University of Virginia.

Dr. Dean is the author or coauthor of articles and abstracts, which are published in prestigious, peer-reviewed scientific journals such as the *Journal of the American College of Cardiology*, *Pediatrics*, and *Congenital Heart Disease*, among others. He has delivered invited presentations for the American College of Cardiology, American Academy of Pediatrics, and other regional and local conferences. He is a member of the American College of Cardiology's Sports and Exercise Cardiology Section Leadership Council. As a former two-sport collegiate athlete he understands the benefits of physical activity and sports participation and he desires to care for patients and athletes in a way that optimizes their quality of life and health.
